

Examples for Genetic Analysis Package (gap)

Jing Hua Zhao

<https://jinghuazhao.github.io/>

Contents

This package is a spin-off of the package `gap`, whereas this vignette is a skeleton to be expanded in the near future.

After installation, you will be able to issue `library(help=gap.examples)` or to view the list within a web browser via `help.start()`. To load the package, issue `library(gap.examples)`.

The package consists primarily of example scripts and supplementary documents installed under the package directory. To explore installed files, use `system.file()` or view documentation via `browseVignettes("gap.examples")`.

`character(0)`

A PDF version of this vignette is generated automatically and can be viewed with

`vignette("gap.examples", package="gap.examples")`

Several other vignettes have also been moved here.
