

Examples for Genetic Analysis Package (gap)

Jing Hua Zhao

<https://jinghuazhao.github.io/>

Contents

This package is a spin-off of the package `gap`, whereas this vignette is a skeleton to be expanded in the near future.

After installation, you will be able to issue `library(help=gap.examples)` or to view the list within a web browser via `help.start()`. To load the package, issue `library(gap.examples)`.

The package consists primarily of example scripts and supplementary documents installed under the package directory. To explore installed files, use `system.file()` or view documentation via `browseVignettes("gap.examples")`.

```
[1] "gap.examples.pdf" "h2.pdf"           "pedtodot.pdf"     "rnews.pdf"
```

A PDF version of this vignette is generated automatically and can be viewed with

```
vignette("gap.examples", package="gap.examples")
```

Several other vignettes have also been moved here.
